

Scrap Busting using a color wheel and Accuquilt Go Cutter

Description

My scrap bin was so full I could not put another scrap in. So time to do the chore I have put off for years. Pull it all out and make a plan of attack. I decided to use my color wheel to help organize and then use my Accuquilt go cutter to cut usable shapes. It ended up being a fun project instead of a chore. I am looking forward to the quilt(s) that come from my newly cut shapes! I hope you enjoy the video and get inspired to dive into your scrap bin.
