

Piecing a quilt with a BERNINA L890

Description

I am really loving piecing quilt tops with a serger. On my BERNINA L890 I have created a custom stitch so every time I want to piece a quilt I can just select the custom stitch. Awesome! The L890 can save up to 100 stitches. I am using the clear foot #C27 so I have a great view of the fabric as it passes the knife. I am not cutting any fabric as I stitch only the extra threads are coming off of the sides. Of course, this is best for quilt patterns that are not curved or intricate but I love making quilts that are simple but beautiful.
